Summary

Full-Stack Developer with hands-on experience building secure, high-performance web applications using the **Spring Boot**, **Nextjs**, **Laravel** ecosystem and modern frontend frameworks. Proficient in architecting robust backend services with **Java (J2EE)**, designing **RESTful APIs**, and implementing secure authentication using **Spring Security**, **Axios** etc and **OAuth2**.

Work Experience

Fidore Health

May 2026 – Present

Fidore Health Pvt. Ltd. / Dr Expert Formulation (Laravel Projects)

Full Stack Developer

- Developed the **HRMS application** from the ground up using Laravel (REST API) and React covering RBAC-based employee management, geolocation-verified attendance and leave tracking with anti-spoofing safeguards, and push notifications.
- Designed and implemented a **Purchase Manager module** from scratch for Dr Expert Formulation, streamlining procurement workflows for a B2B cosmetic contract manufacturing operation.
- Built an interactive **Formulation creation module** that simulates real-world formulation workflows, with version tracking across iterations significantly streamlining the formulation development process for the team
- Led a major revamp of the customer acquisition funnel for Fidore Health improving brand visibility, UI/UX consistency, and conversion-focused landing pages including a city-wise SEO system, alongside ongoing bug fixes and performance optimization. Implemented **DHL Express** for international shipments in coordination with the Malaysian team, significantly cutting paperwork and boosting fulfillment efficiency.

Social Cults

Jan 2026 – Mar 2026

SwissGain (MERN Stack Project)

Full Stack Intern

- Developed responsive and scalable frontend interfaces using React.js, focusing on clean UI/UX and performance. Built and integrated backend services using Node.js and Express.js.
- Designed and managed application data using MongoDB, ensuring efficient data modeling and API performance.
- Implemented end-to-end features, API integrations, and handled state management across the application. Collaborated on debugging, optimization, and improving overall application stability.

Projects

Contexto-AI | Live Preview

React | NodeJs | GeminiSDK | MongoDB

- I developed this app to move beyond the limitations of repetitive, static learning. Instead of rehearsing the same content, **users engage in AI-generated real-world scenarios and conversations. This provides a more realistic experience**, simulating the unpredictability of approaching a stranger in a foreign language.
- Used **@google/generative-ai SDK (Gemini 2.5 Flash API)** serving as the core dynamic roleplay engine, generating personas, localized contexts, and post-interaction actionable analytics.
- Integrated **window.speechSynthesis** directly into the frontend to provide immediate, localized audio feedback without relying on expensive, high-latency external audio generation APIs.

Technical Skills

Languages: Java, JavaScript, TypeScript, PHP, SQL

Backend: Nextjs, SpringBoot, Laravel, Node.js, Express.js, Postman

Frontend: React-Native, React, Next.js, Tailwind CSS, Bootstrap

Technologies: Docker, Redis, Hibernate, JSP, REST APIs

Databases ORM: MySQL, PostgreSQL, MongoDB, Hibernate, Prisma

Tools & Platforms: Git, Github, CI/CD(Github Actions), Claude, Antigravity, Hostinger, AWS (Ec2), Openclaw.

Education

Harlal Institute of Technology and Mgmt (AKTU University Affiliated)

8/10 CGPA

Masters of Computer Application

Aug 2024 – Aug 2026

- Relevant coursework: Web Development, Operating Systems, Data Structures, Algorithms, Database Systems,
